Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1, 2, 4-6, 13, 15, and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague. The phrase “a molecule and a nanoparticles nearby the molecule” is not clear as to how the molecule is related to the nanoparticles. Since its not clear as to how the molecules are related to the nanoparticles, the interaction of the composition with the analyte is also not clear. It would appear that the molecules are attached to the nanoparticles. If so, the claim should be amended accordingly. The claim is also incomplete because there is no correlation step that relates the detected absorption or emissions to the detection (or identification) of analyte.

Claims 18 and 19 are vague because they do not appear to recite additional method steps that would further limit the method of claim 1. Claims 18 and 19 appear to be reciting intended uses for the method of claim 1 and thus do not further limit the claimed method.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4-6, 13, 15, and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Weiss et al.

Weiss et al (US Patent 5,990,479) discloses a method of immunoassay using luminescent semiconductor nanocrystal compounds. The nanocrystal compound is capable of linking to an affinity molecule to form an organo luminescent semiconductor probe capable of luminescence and/or absorption and/or scattering or diffracting when excited by an electromagnetic radiation source of broad or narrow bandwidth (col. 2, lines 17-67 and cols. 3-4). The affinity molecule can be antibodies, nucleic acids, proteins, drugs, etc (col. 6, lines 50-67). The affinity molecules are attached to the nanocrystals by a linking agent (cols. 7-8).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher L. Chin whose telephone number is (571) 272-0815. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le can be reached on (571) 272-0823. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
